
(junior) consultant / analyst

New job position at studio Gear Up

We are looking for an ambitious and entrepreneurial (junior) consultant / analyst with a drive for a sustainable future. We need your intellectual and creative thinking to advise our clients in their activities and positioning for an upcoming biobased and circular economy. studio Gear Up is a growing independent strategic advisory company that provides analyses and market and policy development insights to its clients. The Netherlands aims to reach climate neutrality by 2050. Also the European Union sets policies towards achieving this aim and envisages becoming a circular economy by 2050. This changing policy landscape requires both policy makers, industrial organizations as well as other stakeholders like NGO's to reconsider their activities in this transition. As a (junior) consultant / analyst you will have the opportunity to make a lasting impact and gain experience in an international and dynamic network. If you have a genuine interest in achieving a sustainable future and are equipped with an explorative mindset with strong analytical and communication skills, we are looking for you.

Indicative start date: September 2019.

Company profile

studio Gear Up is a relative young strategic advisory firm, started early 2015. Since its start it has advised both Dutch, European, international organisations and companies on bioeconomy and circular economy related issues. Clients in the recent years include the Netherlands Ministry of Infrastructure and Water Management, the Netherlands Platform Sustainable Biofuels, Netherlands Enterprise Agency RVO, DG Energy of the European Commission, DG Move of the European Commission as well as various commercial organisations (Dutch, European and from other regions). More information can be found at www.studiogearup.com. Also check out www.platformduurzamebiobrandstoffen.nl

Job profile

As (junior) consultant /analyst you will be working on different projects advising government organisations and businesses in a project-based setting. Together with your colleagues you help shaping the transition to a sustainable, biobased and circular economy. You will analyse market developments and explore new designs for sustainable value chains, based on biogenic resources that can replace fossil resources. You will advise clients on how market introduction can best take shape. For governments you assess possible policy instruments that can help accelerate the transition. In all project work you incorporate socio-economic considerations and investigate the necessary conditions for establishing long-lasting and sustainable solutions for our clients. The job includes data analysis work and involves project management activities.

In your work you will have frequent interaction with senior leaders in business, politics, and the NGO world.
