New job position at studio Gear Up in Amsterdam

studio Gear Up is expanding. Therefore, we are looking for an ambitious and entrepreneurial consultant with a drive for a sustainable future. We need your thinking to advise our clients in their activities and positioning for the upcoming biobased and circular economy.

studio Gear Up is an independent strategic advisory company in the field of sustainable mobility, renewable energy, biobased and circular economy. We provide analyses, and market and policy development insights to our clients. The European Union has set ambitious policies and a climate law for reaching a climate neutral economy by 2050. The Netherlands as well aims to reach climate neutrality as quickly as possible. This changing policy landscape requires both policy makers, industrial organisations, and other stakeholders like non-governmental organisations to reconsider their activities in this transition.

As a consultant at studio Gear Up, you'll have the opportunity to generate impact and gain experience in an international and dynamic network. If you are driven by achieving a fossil free and climate neutral future and you are equipped with an explorative mindset with strong analytical and communication skills: we are looking for you.

Indicative start date:

June/July 2023.

Company profile

studio Gear Up is a strategic advisory firm, started in 2015. It advises Dutch, European, international organisations and companies in the transition to a fossil free and climate neutral future. We have a strong knowledge base in bio-economy and circular economy related topics. Clients vary from medium and large companies, start-up innovators, national and European governments, business associations to ngo's. More details on our clients can be found at <https://www.studiogearup.com/about-us/>. For details about some of our recent projects we suggest to explore <https://www.studiogearup.com/latest/>.

Job profile

As consultant you'll be working on various advising projects for government organisations and businesses in a project-based setting. In the team, you'll help with shaping and managing projects, as well as communicate with the client and stakeholders. You'll analyse market developments, identify key elements, and explore new designs for sustainable value chains. You're willing to build expertise in developments in waste and biogenic feedstocks that will replace fossil resources. You'll advise clients on how market introductions can best take shape. For governments, you'll assess and advice about policy instruments that

can help accelerate the transition. In all project work, you'll incorporate socio-economic and biodiversity considerations and investigate the necessary conditions for establishing long-lasting and sustainable solutions for our clients. The job involves detailed data analysis and project management.

In your work you will have frequent interaction with senior business leaders and policy makers, as well as representatives of non-governmental organisations.

Key criteria

Our ideal candidate is somebody who:

- Holds a master's degree. Technical or business background is preferred but not essential,
- Has minimal 3 - 5 years' work experience,
- Has a drive for sustainability,
- Is self-starting and can work independently,
- Shows ownership and build knowledge and expertise on relevant topics,
- Is a strong communicator, and has good social skills,
- Understands stakeholder positions and issues,
- Is inquisitive and explorative in thinking,
- Has a sense for accuracy in formulation and calculations,
- Can independently digest and process information into insights,
- Likes data visualisations
- Is fluent in English and Dutch (both written and verbal), other languages are welcomed,
- Is familiar with and skilled in working with various computer tools and apps, like Excel and PowerPoint, or willing to become skilled,
- Enjoys working in teams.
- Has a valid working permit for the Netherlands

What we offer you

- Working experience in a consultancy / advisory firm with a mission: accelerating the transition to a fossil free and climate neutral future.
- Learning environment where you gain new experiences in projects.
- An impactful, challenging position with room for your own initiative,
- Great opportunity to expand your network with leading international organizations,
- A fulltime job in Amsterdam (0.9 -1.0 fte), with occasional project-related travel,
- A competitive salary.

Is this you?

If this sounds like you, we would like to get in touch.
